2.5 BILLION
TAKE-AWAY CUPS
ARE **THROWN AWAY**
EVERY YEAR IN THE UK

WOULDN'T
IT BE
GREAT

IF WE COULD
TURN THEM
INTO
PAPER
FOR
ARTISTS
INSTEAD?

2.5 billion take-away cups are estimated to be thrown away in the UK each year.

In the past, only 1 in 400 take-away coffee cups were recycled in the UK. This is because it is difficult to separate the plastic lining from the paper.

CupCycling™ by Seawhite's paper supplier James Cropper is the world's first recycling process dedicated to upcycling take-away cups.

Each year 25,000 tonnes of cups are buried in landfill in the UK. CupCycling™ can help to change this.

How CupCycling™ works:

1. Used cups are collected, baled and delivered to James Cropper in Cumbria, UK.
2. Cropper's cutting-edge technology strips the polyethylene lining from the paper fibre.
3. The plastic is sent to be recycled into cables and industrial products.
4. High quality paper fibre is reclaimed and processed according to final use.
5. For artist's paper, it is combined with Seawhite's unique cartridge recipe to form a paper that works spectacularly well with all media: **Seawhite CupCycling™ Cartridge paper.**

Introducing Seawhite CupCycling™ Cartridge Paper*

*Available in sheets and pads (see overleaf for sizes)

If you love Seawhite All-Media Cartridge let us introduce you to a very worthy cousin.

Seawhite All-Media Cartridge is the pound for pound champion of art papers - its versatility proven in schools, colleges and studios throughout the world.

CupCycling™ Cartridge shares much of Seawhite All-Media's DNA. It has outstanding tensile and tear strength and the surface is furnished to withstand an eraser.

CupCycling™ Cartridge has the body and tooth to work well with the widest range of media and techniques. Yet at 140gsm, it outperforms much heavier papers.

Seawhite CupCycling™ Cartridge has 80% recycled content.

CupCycling™ Cartridge offers you the best of all worlds - a fantastic product for artists and students that also helps reduce the amount of plastic sent to landfill.
